

The Flottweg Beer Separator AC1500

We clarify it!

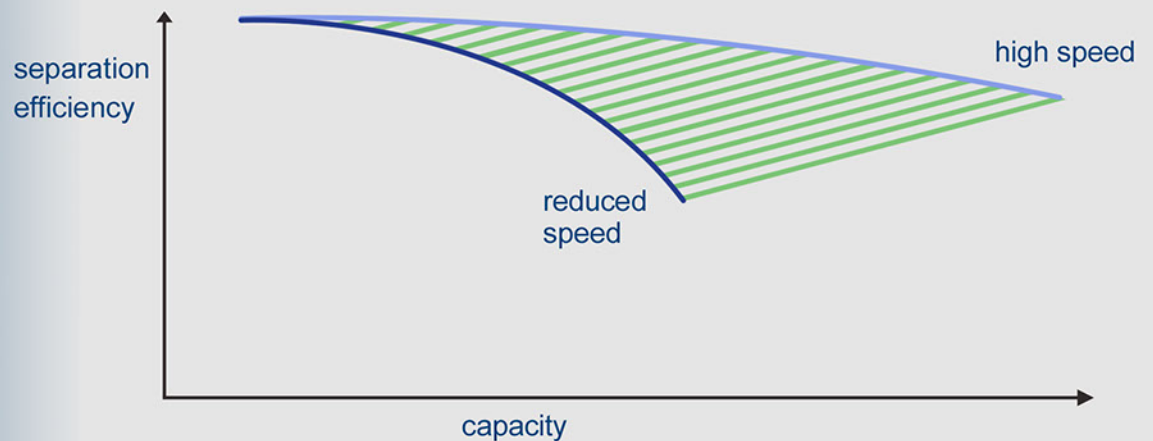

- 
- Longer filter service life
 - Reduced consumption of Kieselguhr
 - Optimized operation processes
 - Reduced beer loss
 - Turbidity adjustment
 - Green beer clarification
 - First step in kieselguhr-free beer filtration

The Beer Separator AC1500 – Reliable and Efficient

- Gentle product treatment
- High solids concentration due to the accurate partial discharge system
- Hygienic design
- Hydro-hermetic sealing in order to avoid oxygen pick-up
- Capacity adjustment dependent on the solids load
- Simple integration into the CIP system
- Low noise due to the “SoftShot[®]” system, additional sound protection is not necessary
- Energy efficient due to the low-wear and low-noise belt drive

Variation of the separation efficiency depending on the capacity using simple speed adjustment

Flottweg Separation - Worldwide Reputation

- Years of experience in centrifuge manufacturing
- Our medium-size structure results in direct communication
- Individualized custom solutions
- Excellent service
